European Directive 2002/95/EC (RoHS)

Dear Sirs,

the RoHS – Guideline permits from 01.07.2006 the usage of lead, mercury, cadmium, chromium (Cr6+), PBB and PBDE.

(following rests of the permitted materials are allowed to be included:

- | | |
|-------------------|-------------------------|
| • Lead (Pb) | 0,1 weight percentages |
| • Mercury (Hg) | 0,1 weight percentages |
| • Cadmium (Cd) | 0,01 weight percentages |
| • Chromium (Cr6+) | 0,1 weight percentages |
| • PBBE | 0,1 weight percentages |
| • PBDE | 0,1 weight percentages) |

In most of all applications of our products the use of these substances is still allowed. So our products are according to RoHS.

The products delivered to you do not contain, in our knowledge, of substances in concentrations or applications, which would prohibit the putting in circulation according to the guideline 2002/95/EG (RoHS).

Products which will be produced after July 1st, 2006 are completely free of RoHS substances.

Best regards

ABL Sursum
